EDUCATION

Madhav Institute of Technology and Science (MITS) Gwalior, MP
B.Tech in Information Technology; CGPA: 8.12/10 *Expected May 2027*
Relevant Coursework: Data Structures & Algorithms, DBMS, Machine Learning, Artificial Intelligence, Statistics, Linear Algebra

EXPERIENCE

Software Developer Intern Oct 2026 – Present
MSG91 *Indore, MP*
- Co-building **M91** (m91.msg91.com), a human-in-the-loop alert escalation platform that routes critical notifications via push, SMS, and voice calls until acknowledged; shipped multiple alerting features to production
- Built the M91 plugin for **viaSocket** (no-code workflow automation), exposing actions to send, fetch, and close direct/channel alerts and manage channels and recipients, so events from 1,500+ apps can trigger M91 alerts
- Developed viaSocket plugins integrating third-party apps through their APIs (triggers, actions, and authentication), and built automation workflows supporting MSG91's upcoming human-alert feature

AI Engineer Intern (GenAI & Agentic AI) Aug 2026 – Sep 2026
CogKnowEdge Solutions *Remote*
- Designed and implemented 7+ hands-on RAG systems (Agentic, Hybrid, Graph, Multi-Vector, OCR, and Vectorless RAG) using **LangChain, LangGraph, Qdrant, and Neo4j** for enterprise GenAI and Agentic AI training programs
- Containerized AI applications with **Docker** and deployed them to **GCP Cloud Run**, using MongoDB Atlas Vector Search and Supabase (**PostgreSQL**) as backend datastores
- Prototyped LLM applications with OpenAI, Claude, Gemini, and LangFlow for enterprise AI consulting use cases; wrote lab guides and documentation

Undergraduate Research Assistant Jan 2026 – May 2026
Madhav Institute of Technology and Science *Gwalior, MP*
- Architected a two-stage **XGBoost** regression pipeline (GridSearchCV-tuned) reaching **R^2 = 0.96** and **85%** lower RMSE than baseline (215.6 vs. 1,452.3); a dynamic clamping step bounds outputs to physical limits, eliminating invalid predictions
- Built a stateless **FastAPI** microservice that calls LLM APIs to score semantic synergy and return structured JSON negotiation reports, with zero-trust API-key validation on every request
- Ran end-to-end EDA on datasets with 50+ features; correlation-driven feature selection reduced model noise by 30%

PROJECTS

Code Archaeologist – Git History RAG System | *Python*, *Pinecone*, *Redis*, *BGE*, *BM25*, *LLM APIs*, *Streamlit* 2026
- Built a RAG system that ingests any GitHub repository's commit history, classifies commits by developer intent, and isolates each user's embeddings in a separate **Pinecone** namespace
- Implemented hybrid retrieval fusing dense BGE embeddings with **BM25** keyword reranking at a 60/40 weighting
- Hardened the public Streamlit Cloud app with **Redis**-backed IP rate limiting, TTL-based cleanup, and admin access control

Tejaskrit – AI Interview Platform | *Python*, *FastAPI*, *OpenAI API*, *Whisper*, *MediaPipe*, *OpenCV*, *React*, *TypeScript* 2026
- Team project (1st Runner-Up, SSH '26): contributed to an adaptive LLM interview engine generating role-specific questions from answer quality; built a real-time pipeline fusing Whisper audio and MediaPipe video signals

Customer Segmentation & Churn Prediction | *Scikit-learn*, *XGBoost*, *SHAP*, *SMOTE*, *Pandas*, *SQL*, *Streamlit* 2025
- Engineered 22 RFM features from **2.5M+ transactions**; segmented customers with KMeans (k=4) and trained a Random Forest churn classifier (**ROC-AUC 0.879**), using SHAP to turn predictions into a $233,917 revenue-at-risk estimate

TECHNICAL SKILLS

Languages: Python, TypeScript, SQL, Java, C/C++
Backend & Integrations: FastAPI, REST APIs, Pydantic, Third-Party API Integration, viaSocket Plugins, Workflow Automation
Databases: PostgreSQL (Supabase), MongoDB (Atlas), Redis, Neo4j
Cloud & Tools: Docker, GCP Cloud Run, Git, GitHub, Streamlit
AI & LLM Systems: LangChain, LangGraph, RAG, Pinecone, Qdrant, MongoDB Atlas Vector Search, OpenAI / Claude / Gemini APIs
ML & Data: Scikit-learn, XGBoost, SHAP, Pandas, NumPy, OpenCV, MediaPipe, Whisper

ACHIEVEMENTS

- 1st Place (team), IKIGAI '26 National-Level Hackathon, AITR Indore Aug 2026
- Top Performer, Web Development Track, Hacksagon, ABV-IIITM Gwalior Apr 2026
- 1st Runner-Up (team Tejaskrit), SSH '26 National Hackathon Feb 2026
- NPTEL Certification: Mathematical Foundations of Machine Learning, IIT Madras (score 73/100) 2026
